Print Series

Designed for outdoor environments/interior applications , individual image/printing. High UV protection(color fading)

Current palette of panel colors SolaAir - <http://solaair.com/colors/>

1 For ease of assembling modules into a single panel there is a connection system

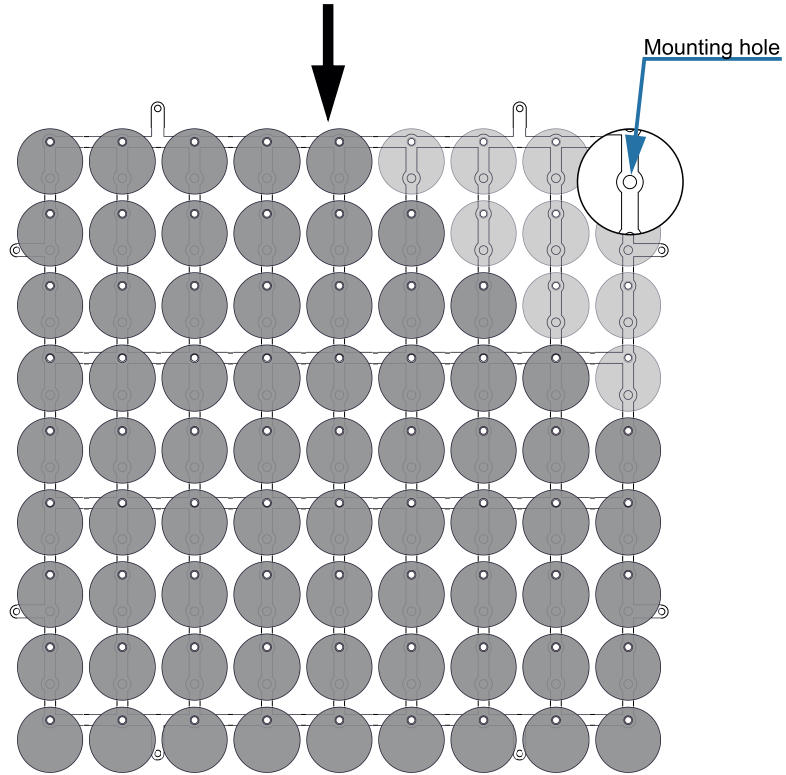

2 Mounting on the base is carried out using self- tapping screws , through holes hidden under the movable element

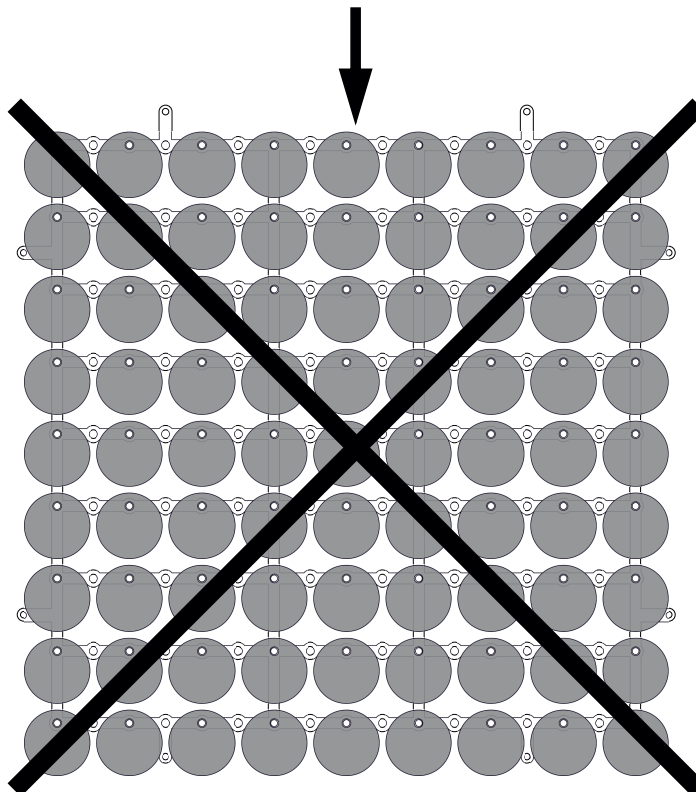

3 If the base size is not a multiple of the module size , it is cut to the desired size, and the remainder can be used in the future

The correct position of the panel

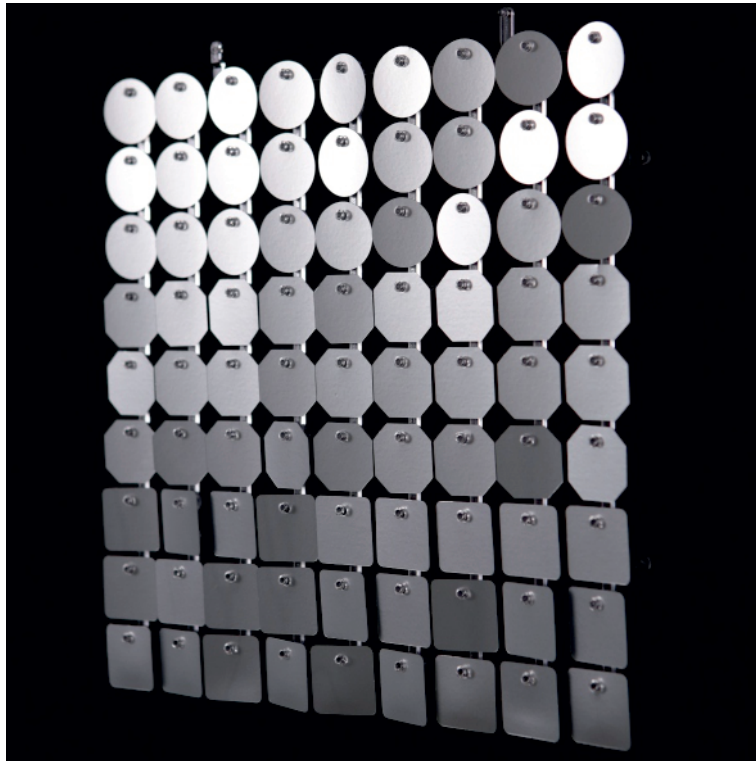

The wrong position of the panel
